Can someone else review the commits I flagged in the review document?

https://spreadsheets3.google.com/ccc?hl=en&key=tuGwl6pYO_AxJsnrP1L5Q0Q&hl=en#gid=0 all commits that are only applied to Redmine and have a Status field (e.g. H,R, F). Make sure to go all the way to the bottom.

Merged about 400 commits to Redmine into unstable including Rails 2.3.11. I'll be opening issues and discussions about the proposed changes from the review now.

I'm expecting the CI server to break until the bundler configuration is updated.
