ChiliProject - Bug # 379: Help controller headings rendered differently in Ruby 1.9

Status:	Closed	Priority:	Normal
Author:	Gregor Schmidt	Category:	
Created:	2011-05-05	Assignee:	
Updated:	2011-05-05	Due date:	

Remote issue URL:	
Affected version:	master
Description:	The newly introduced help views to render wiki syntax help dynamically (see #362) use html_title in an unexpected way. This leads to different behavior in Ruby 1.8 and 1.9 since to_s for Arrays changed. This is already covered by functional tests.

<pre>
<"Wiki Formatting"> expected but was
<"[\"Wiki Formatting\"]">.
<false> is not true. (Test::Unit::AssertionFailedError)
test/functional/help_controller_test.rb:13:in `block in <class:HelpControllerTest>'
</pre>

Merged in commit:5938048 (and I'm still wondering who had that idea, but I don't think that's how it was intended to be used…). Thanks.
