| Affected version: | |
| Description: | When running rake commands like @rake db:migrate@ on the release-2.0.0 branch, I'm getting the following warning: |

<pre>
rake/rdoctask is deprecated. Use rdoc/task instead (in RDoc 2.4.2+)
</pre>

I don't know since when exactly, the warning is emitted, but it may easily be fixed (see attached pull request).

Since rdoc 2.4.2 - which introduced the new rdoc/task "was released in 2009":https://github.com/rdoc/rdoc/blob/master/History.txt#L522, we can probably assume, that adding that dependency will not harm anybody.

It was in the Rails 2.3.12 upgrade (#453). I think Rails missed some requires or requirements which is why they just started appearing (and is why I had

to add rdoc to the Gemfile)
