ChiliProject - Bug # 543: Journalized touch on journal update causes StaleObjectErrors

Status:	Closed	**Priority:**	Normal
Author:	Felix Schäfer	**Category:**	Journals / History
Created:	2011-07-29	**Assignee:**	Felix Schäfer
Updated:	2011-07-29	**Due date:**	

Remote issue URL:	
Affected version:	master
Description:	(see "#441-4":/issues/441#note-4 for initial discussion about this)
	Journals @belongs_to :journalized, :touch => true@, which touches journalized objects/updates their @updated_to@ on every journal update. This causes numerous StaleObjectErrors and is I believe not the desired behavior, which should be to touch the journalized object on create, and not on every update.
