ChiliProject - Bug # 734: Liquid integration breaks on 1.9.2

Status:	Closed	**Priority:**	Normal
Author:	Felix Schäfer	**Category:**	
Created:	2011-11-26	**Assignee:**	Holger Just
Updated:	2011-11-26	**Due date:**	
Remote issue URL:			
Affected version:	unstable		
Description:	There's a problem on 1.9.2 with the liquid integration, as far as I could see it had something to do with gsub! on a frozen string and sub on a symbol http://ci.chiliproject.org/job/chiliproject_unstable/DATABASE=mysql2,RUBY=ruby-1.9.2-p290/lastCompletedBuild/testReport/ Holger, could you have a look?

[#734] Force instance_variables to string for Ruby 1.9 compatibility

2011-11-26 04:10 pm - Holger Just

[#734] Don't modify text inline.

This is not only a wee bit faster (yay!) but also allows use to deal with

frozen strings and doesn't change content which might inadvertently be saved

later on. And it fixes some broken tests on Ruby 1.9 :)

History

Meh.

The reason for most of the errors is almost the same as in #711, i.e. that @instance_variables@ in 1.8 returns an array of strings while it is an array of symbols in 1.9. I'm still investigating the rest of the errors.

- Status changed from Open to Closed

Fixed in commit:28ce07b1 and commit:9f4d12ff.

There is still one test failing, but that one doesn't belong to liquid. See
http://ci.chiliproject.org/job/chiliproject_unstable/70/DATABASE=mysql2,RUBY=ruby-1.9.2-p290/ Unfortunately, I don't really know the cause.
