- Status set to Closed

I added a basic chili favicon based on an image from "flickr":http://www.flickr.com/photos/thebrownhouse/4599233853/sizes/l/. When we do the actual logo we can see about replacing it.

- Target version deleted (1.1.0 â€" Bell)

- Status changed from Closed to Open

Re-opening this and proposing we add the current chili logo to the 2.0 release. I see that the redmine favicon is still in source:/public/favicon.ico so I'm having trouble understanding why this was closed to begin with?

2011-05-20 05:47 pm - Eric Davis

I wonder if I only replaced it in the theme or maybe it was replaced in a merge. I'll look into it today.

2011-05-20 06:31 pm - Eric Davis

- Target version set to 1.4.0

- (deleted custom field) set to 1.1.0

- Status changed from Open to Closed

Fixed, I only added the favicon to the chiliproject.org site. Think this was before we had an official repository set up.

Merged into master (commit:eaa5382) and unstable (commit:00c1852)
